Property Flood Resilience Training for Surveyors

An all-inclusive training course to deepen delegates understanding of all the elements that make up the Property Level Protection (PLP) survey process

This comprehensive 2 day course will help delegates to:

- Explore the history of PLP and how it fits in line with flood protection
- Discuss the different sources of flooding and explain how flood risk determines the suitability of different strategies
- Recognise the importance of householder liaison to understand physical barriers which may affect which strategies are suitable
- Distinguish between different building constructions and understand how they inform the likely performance of PLP
- Appreciate that a variety of PLP and flood resilience solutions exist and recommend appropriate strategies for a given scenario

Book your place now for 28th - 29th November 2016

Venue: PCA Practical Training Centre, Tower Square, Huntingdon
Fees: PCA Members: £320 + vat / PCA non-members: £420 + vat
Contact: E-mail Jo@property-care.org or call 0844 375 4301
Who will benefit from this training?

This course is for anyone who wants to understand the processes involved in the assessment of flood risk and the delivery of flood resistance and resilience in the built environment.

The guidance and expert insights provided will enable attendees to understand the process that should be adopted to undertake competent and comprehensive surveys. Through an in-depth appreciation of all aspects, and including the homeowner in the process, relevant and informed recommendations can be made to help those affected by the challenges and worry of living with the risk of flood.

Training is delivered as a mixture of presentation, group discussion and practical exercises to help consolidate learning.

About the Trainers

Andy McHugh, Flood Risk Consultant, RAB Consultants
- Leads on flood protection and flood risk assessment projects on a national basis (has led on no less than ten local authority led PLP schemes ranging between 3 and 80 properties)
- Supports private homeowners with property surveys and completing applications for flood resilience grant funding
- Has carried out more than 250 Routes of Ingress Surveys, advising on the suitability of flood resistance and resilience measures

John Alexander, MD of Aquobex, Independent Flood Management Solutions
- Experience of delivering bespoke full range PLP projects to 2 LLFAs for over 100 homes
- Developed Aquobex’s portfolio of products and services to over 50 solutions, in order to deliver a truly universal consultancy led flood protection service to customers
