Environmental considerations are a key factor in today's building preservation and protection industries. The judges will look at companies who have introduced positive measures in terms of social, economic, and environmental factors to help drive their business' forward.

As a guide, points to consider can include:

- How the environmental impact of transport and travel planning are measured, monitored, and reduced
- Initiatives implemented on site (or, for manufacturers, in product development) to protect the environment
- Business activity to reduce, reuse and recycle
- How sustainability is supported through procurement, including internal management procedures and the management of suppliers and contractors
- How energy usage is monitored and reduced
- Policies and procedures in place to manage staff health and well-being

Outline and describe your entry fully, indicating how it meets the requirements of the chosen category. **You will need to adhere to the word count of 1,000 words.** You can submit supporting photos and documentation, although please limit this to 2 sides of A4, including photos and attachments.
